PROFILE

Business-minded CS + Business student combining technical fluency with hands-on experience in requirements gathering, data analysis, and stakeholder communication. Built executive-grade BI dashboards and data-driven tools that translate business needs into working systems. CPT authorized F-1 student available immediately for internship. Thrives bridging technical teams and business stakeholders.

EDUCATION

B.S. Computer Science, Business Minor · [Huston-Tillotson University](#)

Jan 2024 – Dec 2027 · Austin, TX

GPA: 3.2 · Merit Scholarship (\$5,000) · Coursework: Data Structures, Databases, Web Programming, Financial Accounting, Enterprise Computing, Information Systems

PROJECTS

Porsche Global Performance Intelligence — BI Dashboard · Python · Pandas · Plotly · Excel · Data Analysis · GitHub Pages May 2026
khatiwada5.github.io/Porsche_Global_Performance_Intelligence

- Defined analytical framework and built executive BI dashboard analyzing Porsche global sales across 7 models, 5 regions, and 2018–2024 — modeled from publicly reported annual figures
- Delivered regional revenue breakdown, model profitability matrix, EV transition tracker, and linear regression forecast with conservative and optimistic scenarios
- Wrote 4 McKinsey-style strategic recommendations on EV transition, China market recovery, pricing architecture, and supply management — each with rationale and expected business impact
- Packaged full data deliverable: documented Excel workbook with 4 analytical sheets, Python source code, and data dictionary — mirrors real analyst output

Smart Stock Advisor — AI Financial Analysis Platform · Python · JavaScript · Groq API · Business Logic Design · Vercel Jan 2026 – Present

smart-stock-advisor-fawn.vercel.app

- Gathered requirements and designed 4-page user workflow based on retail investor pain points — mapped business rules into system features before any development
- Translated complex financial logic (DCA optimization, risk tolerance inputs, stop-loss thresholds, portfolio concentration limits) into working AI-powered product

E-Commerce Management System · PHP · MySQL · Requirements Gathering · Data Modeling

Jan – May 2024

- Documented functional requirements for customer and admin workflows; designed relational database schema supporting inventory, orders, and user role management

WORK EXPERIENCE

Full Stack Developer Intern · [The Last Door Solutions](#)

Jan 2023 – Dec 2023 · Kathmandu, Nepal

- Worked directly with U.S., Canada, and UAE clients to gather requirements, define scope, and translate business needs into technical deliverables — coordinated across design, dev, and client stakeholders
- Documented system workflows, user stories, and technical specs to align development output with client expectations throughout each project

Sales Representative · [Honda Nepal](#)

Jul 2022 – Dec 2022 · Kathmandu, Nepal

- Conducted customer needs assessments to recommend products and financing; tracked sales data and identified patterns to improve recommendations

Community Development & Operations Assistant · [Deepjyoti Group](#)

Dec 2020 – Apr 2022 · Kathmandu, Nepal

- Coordinated rural education initiative — liaised with school admins and community stakeholders, tracked donated resources, and prepared structured reports for leadership

SKILLS

Business: Business Analysis, Requirements Gathering, Data Analysis, Process Documentation, Financial & Managerial Accounting, Stakeholder Communication, Project Management, Client Management

Technical: SQL, MySQL, Python, Pandas, Plotly, Excel, JavaScript, PHP, HTML/CSS, REST APIs, Git — able to query, analyze and visualize data independently

Languages: English (Fluent) · Nepali (Native) · Spanish (Basic) **Soft Skills:** Public Speaking, Adaptability, Cross-functional Collaboration
